

Nuvem

Integrated cloud-based pharmacy solutions partner for non-profit healthcare organizations, specializing in 340B program compliance, optimization, and management.

<https://nuvem.com>

Overview

Nuvem is a leading integrated pharmacy solutions partner that provides a comprehensive suite of cloud-based technology and consulting services, primarily focused on the complex 340B drug pricing program for non-profit healthcare organizations and Covered Entities. The company, founded in 2014, unified its three legacy brands (340Basics, Assent, and Apovia) under the single Nuvem brand in 2023 to offer a holistic, single-source solution.

The platform is designed to optimize accessibility and adherence to medication, yielding enhanced drug inclusion, increased financial performance, and improved patient care. It provides a complete, streamlined experience to manage the entire pharmacy program, offering 100% visibility into patient scripts.

Key Features and Capabilities:

340B Technology Suite: Proprietary software for efficient management of 340B program complexities.

Contract Pharmacy Management: Streamlines program management and multiple pharmacy partnerships, automatically determining 340B eligibility.

Advanced Referral Program: Compliantly captures potential referral prescriptions and obtains required documentation for 340B program inclusion.

Louvir Advanced Analytics & Reporting: Provides an integrated, holistic view of the 340B program with real-time access to financial and operational data, leveraging Business Intelligence tools for data-driven decisions.

Program Integrity & Compliance Tools: Includes services like mock audits, outsourced 340B management, and comprehensive consulting to maintain confidence in HRSA compliance.

Integrated Audit Module: Allows organizations to conduct audits like an expert, adhering to HRSA guidelines.

Pharmacy Management Services: Offers Clinical Programs and Patient Engagement solutions to improve the patient journey.

Target Users and Support: Nuvem supports health centers and systems of all sizes. Client support is emphasized with a dedicated account manager, educational resources, expert recommendations, and a 24/7 ticketing system. The implementation process is described as accelerated and efficient.
