

Oncentric

An all-in-one, cloud-based practice management and EHR suite specialized for community oncology and hematology practices, developed by CureMD.

<https://example.com/1762583716455>

Overview

Oncentric, a comprehensive suite of technology solutions and services from CureMD Oncology, is designed to elevate the standard of cancer care for community oncology and hematology practices. The platform unifies clinical, administrative, and financial workflows into a single, seamless environment, enabling unprecedented collaboration, productivity, and growth. It is a complete, web-based enterprise practice management solution that is adaptable to the unique needs of practices ranging from single-physician offices to large cancer centers.

Key Capabilities:

Oncology-Focused EHR/EMR: An award-winning electronic health record system tailored for oncology and hematology, featuring rapid documentation at the point of care, customizable plans of care, and provider note templates.

Revenue Cycle Management (RCM) Services: Oncology-specific RCM services and intelligent billing solutions that automate tasks like e-claims, clean claim checks, and claim coding, aiming to reduce denial rates and accelerate reimbursements.

Integrated Workflows: Centralizes all clinical, administrative, and financial tasks, including appointment scheduling, electronic billing, and comprehensive reporting.

Drug & Inventory Management: Features for optimizing inventory of medications, vaccines, and DME, including drug profiles with safety alerts, dose capping, and automated volume/wastage calculations.

Clinical Decision Support: Includes a unique FHIR interface with the NCCN® Regimen Library to bring current protocols and updates directly into the workflow.

Patient Engagement: Comprehensive tools like a patient portal, automated appointment reminders, and secure messaging to enhance patient interactions and reduce no-shows.

AI Technology: Leverages AI-powered tools such as an AI Medical Scribe and autonomous billing solutions to enhance efficiency and reduce administrative burden.

Oncentric's vision is to empower oncology practices to deliver personalized, evidence-based care close to home, focusing on both clinical excellence and financial sustainability.

Key Features

- Oncology-Focused EHR/EMR
- Revenue Cycle Management (RCM) Services
- NCCN Regimen Library Integration (FHIR)
- AI-Powered Autonomous Billing
- Integrated Inventory Management
- Comprehensive Patient Portal & Engagement
- Telehealth
- AI Medical Scribe
- Value-Based Care Tools

Pricing

Model: enterprise

Contact vendor for custom pricing based on practice size, specialty (Oncology/Hematology), and required services (EHR, PM, RCM). Pricing is not publicly disclosed.

Target Company Size: small, medium, enterprise

Integrations

NCCN Regimen Library (FHIR), Drug Cabinet Interfaces

Compliance & Certifications

HIPAA
