

# One Step Software

Comprehensive behavioral health software for addiction treatment centers, sober living homes, drug courts, and recovery coaches.

<https://www.onestepsoftware.com>

---

## Overview

---

One Step Software is an all-in-one practice management and client engagement platform specifically designed for the behavioral health and addiction recovery industry, including sober living homes, treatment centers, recovery coaches, and drug courts. The platform's primary goal is to help organizations run data-driven programs, automate manual workflows, and improve client outcomes.

Key capabilities include a secure, HIPAA-compliant mobile app that fosters client-alumni engagement and communication, allowing residents to view schedules, track sobriety, and check-in. For administrators, the software automates critical functions like client intake, rent/program fee billing (autobill), and compliance tracking. It provides complete visibility into program outcomes through advanced data analytics and reporting, which can be essential for grant funding and demonstrating program efficacy. Core features also include EMR/EHR functionalities, medical billing, appointment scheduling, and e-prescribing tools, all centralized to reduce paperwork and streamline operations for staff and clinicians.

### Target Users & Use Cases:

**Target Users:** Program Directors, Clinical Staff, House Managers, Recovery Coaches, Billing Administrators.

**Use Cases:** Sober Living Management, Addiction Treatment Program Management, Drug Court Case Management, Client Outcomes Tracking, Alumni Engagement, Automated Billing.
