

# Perfect RIS

An integrated Radiology Information System (RIS) by SaruTech to streamline radiology workflows, patient management, and report generation.

<https://example.com/1762583716454>

---

## Overview

---

Perfect Radiology Information System (Perfect RIS) is a comprehensive software solution engineered by SaruTech to enhance the efficiency and effectiveness of modern medical imaging departments. The system provides an integrated suite of tools designed to streamline operations, improve patient safety, and ensure seamless communication across healthcare services.

### Key Features and Capabilities:

**Request Tracking and Management:** Simplifies the handling of imaging requests, allowing for management and prioritization with labels like "urgent" or "high priority." It includes detailed forms for collecting essential pre-imaging information, such as patient details and MRI contraindications, ensuring safety checks are in place.

**Imaging Document Storage:** Offers robust and secure storage for a wide range of image formats, including DICOM and PNG. Radiologists can easily select images for inclusion in customized patient files and diagnostic reports.

**Preliminary and Final Report Generation:** Facilitates a dual-stage reporting process where preliminary reports can be generated and seamlessly transferred for final review, completion, and submission, ensuring thoroughness and accuracy.

**EMR Systems Integration:** Engineered to seamlessly connect radiology workflows to existing Electronic Medical Record (EMR) systems for unified care and communication.

**Dynamic Charts and KPI Tracking:** Supports strategic decision-making and helps maintain high standards of care and service delivery by providing tools for tracking Key Performance Indicators (KPIs).

**Offline & Online Functionality:** The system is built to function seamlessly even with internet interruptions, allowing continuous operations in environments with limited connectivity. Data automatically syncs with the cloud when connectivity is restored.

Perfect RIS is part of SaruTech's broader Clinical Practice Management Ecosystem, integrating with other modules like Billing, E-Prescription, and Laboratory Management Systems. It is designed to be highly customizable and is suitable for a wide range of healthcare organizations, from small clinics to large enterprises.

## Key Features

---

- Request Tracking and Prioritization
- DICOM and PNG Image Document Storage
- Preliminary and Final Report Generation
- EMR Systems Integration
- Dynamic Charts and KPI Tracking
- Online and Offline Functionality

## Pricing

---

**Model:** freemium

Offers a free version for single-user, offline use on one PC. Subscription plans are required for multi-user access, online sync, cloud services, and advanced features. Pricing is not publicly disclosed and requires a quote.

**Target Company Size:** small, medium, enterprise

## Integrations

---

EMR Systems, Perfect Billing System, Perfect Laboratory Management System, Perfect E-Prescription System

## Compliance & Certifications

---

HIPAA, GDPR
