Overview

PIMSY EHR (Provider Information Management System) is a robust, ONC-certified Electronic Health Record and practice management solution built explicitly for mental and behavioral health, psychiatry, and substance use programs . Founded in 2007, PIMSY has grown to support thousands of providers across the U.S. and Canada .

The software offers an all-in-one suite of solutions, eliminating the need for multiple systems. Key capabilities include a comprehensive Revenue Cycle Management (RCM) module for billing, payments, and payroll, as well as clinical features like customizable notes, e-Prescribing (eRx/eMAR), and integrated Telehealth . It also features PAISLY AI, an AI-assisted note generation tool, to enhance clinical efficiency .

PIMSY is designed to be highly customizable to adapt to unique workflows and is suitable for practices of all sizes, from solo practitioners to large enterprise organizations . The system offers a hybrid deployment model, with the main administrative module as a Windows Desktop application and the client/provider portals being browser-based for remote access . The solution is hosted on Microsoft Azure Secure Cloud, ensuring patient data is protected .

Key Features

- Customizable Clinical Notes
- Revenue Cycle Management (Billing/Payments/Payroll)
- Patient/Client Portal
- Telehealth

- e-Prescribing (eRx/eMAR)
