

Planon

A global leader in Smart Sustainable Building Management software, providing an Integrated Workplace Management Solution (IWMS) for real estate and facilities.

<https://planon.com/>

Overview

Planon is a leading global provider of Smart Sustainable Building Management software, offering a comprehensive suite of solutions for real estate, facilities, and workplace management, known as an Integrated Workplace Management Solution (IWMS). The platform is designed to connect buildings, people, and processes by eliminating data silos and integrating the diverse landscape of smart building technology, business solutions, and data into one source of truth.

Key Solutions & Capabilities:

Real Estate Management: Includes property management, lease management, and lease accounting compliant with standards like IFRS 16 and ASC 842.

Space & Workplace Services Management: Offers tools for strategic space planning, optimizing occupancy, and utilizing CAD drawings/digital floor plans.

Asset & Maintenance Management (CMMS): Supports building and asset maintenance tasks, centralizing asset information, maintenance history, and streamlining work order management.

Energy & Sustainability Management: Monitors energy consumption, tracks carbon emissions, and helps organizations comply with industry standards and achieve ESG goals.

Field Services Business Solution: Designed for service providers, encompassing contract management, work planning, and mobile field services.

The platform is built on an Open Application Platform, leveraging IoT and AI technologies to create intelligent buildings with features like automated controls and real-time data-driven decision-making.

Key Features

- Integrated Workplace Management Solution (IWMS)

- Lease Accounting (IFRS 16, ASC 842 Compliant)
- Asset & Maintenance Management (CMMS)
- Space & Workplace Utilization Management
- Energy & Sustainability Management
- IoT & AI Integration for Smart Buildings
- Mobile Field Services
- Open Application Platform and API

Pricing

Model: enterprise

Subscription-based SaaS license model with annual billing, priced based on the number of named users and the required solution scope. Custom pricing is provided upon request.

Target Company Size: medium, enterprise

Integrations

SAP, Microsoft Azure, Autodesk Revit (BIM), IoT Sensors and Devices, AI Technology

Compliance & Certifications

ISO 27001, SOC 2, ISAE 3402 Type II, TX Ramp Certificate
