PracticeQ

Cloud-based EHR and practice management software for healthcare providers, featuring customizable HIPAA-compliant forms, e-prescribing, and integrated billing.

https://www.practiceq.com

Overview

PracticeQ is a cloud-based Electronic Health Record (EHR) and practice management platform designed to streamline operations for a wide range of healthcare practices, including behavioral health, chiropractic, direct primary care, nurse practitioners, and physical therapy clinics. The software's main goal is to improve workflow efficiency, enhance patient engagement, and allow providers to dedicate more time to patient care.

Key Features and Capabilities PracticeQ offers a comprehensive suite of tools in a single application. A core offering is its highly customizable, HIPAA-compliant online intake forms, which allow for paperless patient registration, medical history collection, and consent forms. The platform's drag-and-drop form builder and conditional logic simplify the intake process and ensure accurate data collection.

Other main features include:

Appointment Management: Online booking, self-service scheduling for patients, automated reminders, and integration with Google Calendar.

Billing & Payments: Integrated payment processing, invoicing, recurring payments, and insurance billing (claims and superbills). The integrated payment processor is often cited as a cost-effective alternative to third-party providers.

EHR/EMR: Patient charting templates, progress notes (like SOAP), treatment planning, and secure document sharing.

Telemedicine: 1:1 in-house telehealth video included, with options to integrate with external services like Zoom and Google Meet.

Patient Portal: A secure online hub for patients to manage appointments, complete forms, make payments, and engage in HIPAA-compliant messaging with their provider.

E-Prescribing: Available as an optional paid add-on, featuring integration with networks like ScriptSure for electronic medical prescriptions and refill requests.

Target Users and Benefits PracticeQ is purpose-built for thousands of small to mid-sized practices, offering an easy-to-use and affordable solution with no contracts. Users frequently praise its intuitive interface, flexibility, and the responsiveness of its customer service. The automation of administrative tasks, such as automated reminders and intake, is a key benefit, reducing administrative workload and improving overall practice efficiency.
