PracticeSuite

Cloud-based all-in-one medical practice management, billing, and EHR software with RCM, patient engagement, and AI-powered claims processing.

https://practicesuite.com

Overview

PracticeSuite is a comprehensive, cloud-based, all-in-one medical office solution designed to help practices "Practice Profitably" by streamlining operations, boosting revenue, and ensuring regulatory compliance.

Founded in 2004, the platform is modular and scalable, supporting over 150 billing specialties and ranging from solo practices to multi-location groups and medical billing companies.

Key Features and Capabilities:

Revenue Cycle Management (RCM) & Billing: Features include medical billing automation, claims management, real-time claims tracking, a Money Pulse Monitor System™ to prevent revenue leakage, and support for complex billing requirements like UB04 and Workers Comp.
Electronic Health Records (EHR): Offers an ONC-certified EHR solution with customizable workflows, templates, dashboards, and advanced features like growth charts and patient education functionality.
Practice Management: Includes Resource-Based Patient Scheduling, Automated Eligibility Checks, and comprehensive financial and productivity dashboards.
Patient Engagement: Features a Patient Portal for online scheduling, digital check-in, access to records, and secure communication tools like encrypted email and chat.
Technical & Compliance: The platform is cloud-based, utilizes FHIR and Meaningful Use APIs for interoperability, and is SOC2 and HIPAA/HITECH compliant.
AI Integration: Integrates AI features to automate routine tasks, accelerate reimbursements, and reduce claims denials.
PracticeSuite offers a 100% free, Single User Edition of its cloud-based electronic medical billing software, with full plans available via personalized quote.
