

Praxis EMR

AI-driven, template-free Electronic Medical Records (EMR) software that learns from the physician's documentation style to increase charting speed and efficiency.

<https://example.com/1762583716455>

Overview

Praxis EMR is an award-winning, AI-based Electronic Medical Records (EMR/EHR) system that champions a template-free approach, allowing physicians to document in their own words and individual style. The core technology is the AI-powered Concept Processor, which learns from the individual physician's behavior and clinical vocabulary, anticipating actions and streamlining note-taking over time. This method is designed to save physicians an average of two to three hours per day on charting.

Key capabilities include comprehensive clinical documentation, practice management, and decision support. The system features Intelligent Practice Advisories, which act as a real-time clinical support system by providing just-in-time medical guidance and treatment protocols. It also includes an integrated Patient-Provider Portal that manages content based on individual patient encounters, and AI Smart Agents that automate patient engagement and communication through secure email and portal interactions.

Praxis EMR offers multi-deployment options, including cloud-based and on-premise solutions, and is scalable for a wide range of practice sizes, from solo practitioners to enterprise hospitals. It is certified as a complete EHR for MACRA and freely automates CMS Quality Reporting Programs. Users consistently rate it highly for its adaptability, customization, and responsive customer support.

Key Features

- AI-Driven Concept Processor
- Template-Free Clinical Documentation
- Intelligent Practice Advisories (Decision Support)
- Integrated Patient-Provider Portal
- Practice Management (Billing & Coding)
- e-Prescribing and EPCS

- Telemedicine
- DataMiner Research Tools

Pricing

Model: subscription

The First Provider license starts at \$219/month for a 60-month ownership plan, or \$259/month for a 48-month plan. After the plan is complete, the provider owns the license for a lifetime, with Comprehensive Support, Updates, and Upgrades costing \$70/month for a lifetime. Non-provider users are included at no cost.

Starting at: USD \$219

Target Company Size: small, medium, enterprise

Integrations
