

Prognosis Psychiatry

A HIPAA-compliant, cloud-based Electronic Health Record (EHR) and practice management solution with specialty-specific templates for mental and behavioral health.

<https://prognosis.com>

Overview

Prognosis Psychiatry EHR is a comprehensive, fully-integrated, and highly customizable electronic health record and practice management solution from Bizmatics (founded in 2002). It is specifically tailored for mental and behavioral health professionals with a rich library of customizable templates for psychiatric evaluations, progress notes, and treatment plans. The system is designed to streamline clinical and administrative workflows for practices ranging from solo practitioners up to large multi-specialty enterprise groups.

As a fully-integrated system, Prognosis encompasses Electronic Health Records, Practice Management, Medical Billing, and Revenue Cycle Management (RCM), allowing for seamless transition between clinical and financial tasks with a single click. Key features include e-Prescribing (EPCS compliant), built-in telemedicine for virtual consultations, and a secure Patient Portal for patient engagement, self-scheduling, and online payments. The platform also incorporates cutting-edge AI-powered tools such as Prognosis Scribe and Virtual Assistant to enhance documentation efficiency and reduce provider workload.

Prognosis is ONC-certified and adheres to strict compliance and security standards, including HIPAA, HITECH, and SOC 2 Type II. Security features include Multi-factor Authentication (MFA), Single Sign-on (SSO), and AES-256 encryption for data at rest and in transit. The system is accessible via web and dedicated mobile applications (iOS/Android) and offers flexible deployment options, including cloud-based (hosted on Amazon AWS) and on-premise solutions.

While praised for its comprehensive feature set and customization, some users have noted that the software can be less intuitive than desired and have reported occasional challenges with support.

responsiveness. Implementation time can vary from as little as six weeks to six months, depending on the practice's size and complexity.
