

Prognosis

Comprehensive, cloud-based EHR, Practice Management, and Medical Billing solution for ambulatory practices of all sizes and specialties.

<https://prognosis.com>

Overview

Prognosis, by Bizmatics, is a comprehensive, cloud-based Electronic Health Record (EHR) and Practice Management (PM) solution designed to streamline clinical and administrative workflows for ambulatory practices across all specialties. The platform is scalable, serving practices from solo practitioners to large multi-specialty enterprise groups.

Key Features and Capabilities: Prognosis offers a fully-integrated suite of tools, including EHR, PM, Medical Billing, and Revenue Cycle Management (RCM), allowing for seamless transitions between clinical and financial tasks. The system is highly customizable, featuring a rich library of specialty-specific templates that allow providers to tailor their documentation and workflow.

PrognosisAI: An AI-powered tool that includes Scribe and Virtual Assistant features to enhance documentation efficiency, summarize patient history, and reduce provider workload.

Telemedicine: Built-in solution supporting secure video, email, and text for virtual consultations and hybrid care models.

Patient Engagement: Features a secure Patient Portal for patient access to medical records, online payments, appointment scheduling, and communication with the provider.

e-Prescribing (eRx): Real-time prescription functionality, including support for Electronic Prescriptions for Controlled Substances (EPCS) with two-factor authentication.

Billing & RCM: Integrated solution for claims management, payment posting, denial tracking, eligibility verification, and detailed financial reporting to optimize revenue.

Target Users and Use Cases: Prognosis is versatile and caters to a wide range of medical specialties, including Primary Care, Pain Management, Cardiology, OB-GYN, and Mental/Behavioral Health. It is used by solo practices, small, medium, and enterprise-level healthcare organizations seeking a unified clinical and financial system.
