---

## Overview

---

pVerify is a cloud-based, HIPAA-compliant SaaS solution that specializes in real-time and batch patient insurance eligibility and benefits verification for medical, dental, and vision providers. Founded in 2006, its primary focus is to streamline the front-end revenue cycle management (RCM) process to maximize practice revenue and minimize insurance denials.

The platform offers a fully-customizable Eligibility Portal for manual checks and a robust set of over 140 APIs for seamless integration with existing systems. Key solutions include Core Eligibility Verification, Enhanced Patient Coverage Insights, Insurance Coverage Discovery, Claim Status, and Medicare-focused solutions (SNF, Same or Similar, CMN). The Patient Estimator tool is also included to help providers calculate patient financial responsibility upfront.

pVerify targets a wide range of organizations, including clinical providers, hospital systems, DME suppliers, pharmacies, labs, Health IT/EHR/EMR vendors, and RCM/billing companies. The company emphasizes a service-oriented approach with hands-on support and compliance, having successfully completed a SOC2 Type II audit to ensure data security and PHI protection.

### Key Capabilities:

**Real-Time & Batch Verification:** Instant eligibility checks across a network of over 1,500 payers.

**API-First Approach:** Offers 140+ APIs (including REST, HL7, FHIR, ANSI X12) for deep integration into EHR/PM systems.

**Compliance & Security:** HIPAA and SOC2 Type II compliant with data encryption and hardware firewalls.

**Financial Transparency:** Patient Estimator for calculating copays, deductibles, and co-insurance.

## Key Features

---

- Real-time Eligibility Verification (Medical, Dental, Vision)
- Batch Eligibility Processing
- Patient Financial Estimator
- Insurance Coverage Discovery
- Prior Authorization Automation (Fast-PAAS)
- Claim Status Tracking
- Medicare Solutions (SNF, Same or Similar)
- 140+ RESTful APIs
