QuickEMR

Cloud-based EMR and practice management software for therapy practices, featuring fast documentation, scheduling, and billing.

https://quickemr.com

Overview

QuickEMR is a cloud-based Electronic Medical Records (EMR) and practice management software specifically designed for a wide range of therapy practices, including physical, occupational, and speech therapy. It also supports disciplines like pediatric, geriatric, chiropractic, and mobile/home health. The core value proposition is to save time and reduce overhead by providing quick, paperless, and customizable charting, with the goal of completing daily visit notes in less than 5 minutes.

The platform is highly customizable, allowing users to create their own forms, templates, and validation criteria to meet various standards, including Medicare and commercial insurance requirements. Key features include an advanced appointment scheduling system with patient waitlist and self-check-in features, comprehensive documentation with customizable templates and shortcodes, and integrated medical billing services with claim submission and denial management. It also features a Patient Portal for health records and secure messaging, an in-app chat for secure team communication, and in-depth reporting and analytics tools. QuickEMR is accessible from any device with a web browser, including Windows, Mac, iPhone, iPad, and Android devices. The software is praised for its ease of use, affordability, and exceptional, responsive customer support.
