

Relativity

Market-leading e-discovery and legal technology platform used to organize data, discover the truth, and act on it across litigation, investigations, and compliance.

<https://www.relativity.com/>

Overview

Relativity is a comprehensive and extensible legal technology platform designed to manage and analyze large volumes of electronic data for e-discovery, internal investigations, and compliance reviews. The platform offers two primary deployment options: **RelativityOne**, the secure, cloud-based SaaS solution built on Microsoft Azure, and **Relativity Server**, the on-premise offering.

Relativity simplifies and accelerates the entire e-discovery lifecycle, from legal hold and data collection to processing, review, and production. Key capabilities include advanced analytics, machine learning, and visualization tools to quickly identify key issues and prioritize data sets. The platform is highly customizable, allowing users to create tailored workflows and utilize the **Relativity App Hub**—an API-powered marketplace—to integrate custom solutions and third-party applications.

Key Features and Capabilities:

Relativity aiR: AI-powered solutions for generative AI-assisted document review, privilege review, and data breach response.

Legal Hold: Centralized, defensible, and repeatable process for preserving electronically stored information (ESI).

Data Processing: In-house processing engine for metadata extraction, domain parsing, and preparing native files for review at scale.

Document Review: Customizable coding layouts, redaction tools, email threading, and near duplicate detection.

Security & Compliance: Built on a foundation of aggressive compliance standards, including HIPAA, FedRAMP, and SOC 2 Type II, with security features like 2FA and SSO support.

Target Users and Use Cases: Relativity is primarily used by large corporations (including Fortune 100 companies), law firms (including the Am Law 200), and government agencies (including the U.S.).

Department of Justice) to solve complex data challenges in high-stakes legal and regulatory projects.

Key Features

- e-Discovery & Litigation Support
- AI-Powered Document Review (Relativity aiR)
- Data Breach Response
- Legal Hold Management
- Customizable Workflows & Automation
- Advanced Analytics & Visualizations
- Data Processing & Production
- API for Custom App Development (App Hub)
