

Sage Intacct

Cloud-based financial management and accounting software for mid-sized businesses, offering real-time visibility, automation, and multi-entity consolidation.

<https://www.sage.com/en-us/sage-business-cloud/intacct/>

Overview

Sage Intacct is a leading cloud-native financial management and accounting software, specifically designed for growing mid-market and enterprise organizations. It is the only cloud accounting software endorsed by the American Institute of Certified Public Accountants (AICPA). The platform's core strength lies in its **Multi-Dimensional General Ledger** which uses eight predefined dimensions (like department, project, employee) to capture the business context of transactions, enabling unparalleled financial and operational insight without a complex chart of accounts.

Key Benefits and Capabilities:

Real-Time Visibility: Highly customizable dashboards and over 150 built-in financial reports provide instant, drill-down access to financial and operational metrics.

Automation: Deep automation of core accounting processes, including Accounts Payable (AP) and Accounts Receivable (AR) workflows, revenue recognition, and AI-powered time and expense management, which significantly reduces manual effort and accelerates the financial close.

Multi-Entity Management: Seamlessly handles complex, multi-entity, and multi-currency organizations with instant, continuous consolidations and a shared chart of accounts.

Industry Specialization: Offers specialized functionality and compliance for industries such as Healthcare, Nonprofit, SaaS/Subscription, and Professional Services.

Sage Intacct operates on a modular, subscription-based model, allowing businesses to scale by adding modules like Project Accounting, Inventory Management, and Advanced Reporting as their needs evolve.

Key Features

- Multi-Entity & Global Consolidations
- Multi-Dimensional General Ledger
- Real-Time Customizable Dashboards
- Accounts Payable & Receivable Automation
- Revenue Recognition & Billing
- Project & Grant Accounting
- AI-Powered Time & Expense Management
- Advanced Audit Trail

Pricing

Model: enterprise

Custom, quote-based subscription. Pricing is determined by the number and type of users (Business vs. Employee), the specific modules selected, and organizational complexity (e.g., number of entities). Annual subscriptions typically range from \$9,000 to \$35,000+, with implementation costs often ranging from \$10,000 to \$30,000+.

Target Company Size: small, medium, enterprise

Integrations

Salesforce, EMR Connect (Healthcare), Payroll Systems, Banking Software, 350+ Marketplace Integrations

Compliance & Certifications

HIPAA, HITECH, GDPR, CCPA, ISO 27001, PCI DSS Level 1
