

Sentricks Engage

A whole-health resident engagement platform for senior living communities, delivered via in-room TV, mobile app, and web portal.

<https://sentricks.com>

Overview

Sentricks Engage is a core component of the Sentricks360 suite, designed specifically for senior living communities to enhance resident engagement, satisfaction, and overall well-being. The platform delivers tailored communication and interactive content to residents, families, and staff through multiple endpoints, including in-room resident TVs, a senior-friendly mobile app (iOS and Android), digital signage, and a web portal.

Key Benefits:

Enhanced Resident Well-being: The platform supports whole-health engagement with MIND (e.g., Mood Tunes, Mindset content), BODY (e.g., senior-safe exercises, activity registration), and SPIRIT applications.

Streamlined Communication: It features a proprietary Content Manager (CMS) that allows staff to effortlessly deliver important content, such as interactive calendars, daily menus, photo galleries, and real-time alerts, to the right audience on the right device.

Data-Driven Insights: Engage captures data points on resident habits and participation, which, when integrated with the Sentricks360 suite, provides actionable insights to caregivers and clinical teams to inform care decisions and support proactive interventions.

Family Connection: The mobile app provides families with real-time updates on their loved one's engagement and access to community events, fostering greater peace of mind and transparency.

Target Users & Use Cases:

Target Users: Senior Living Community Staff (Engagement Directors, Clinical Teams), Residents, and Residents' Families.

Use Cases: Community activity registration, real-time community announcements, on-demand senior exercise classes, in-room telehealth access, and attendance tracking for compliance and engagement

optimization.
