---

## Overview

---

Simplifi 797, part of the Wolters Kluwer Simplifi+ suite, is a leading pharmacy compliance solution designed to streamline sterile and non-sterile compounding workflows and ensure adherence to USP 797, 795, and 800 standards. It is a closed-loop system that automates critical processes, reduces regulatory risks, and supports audit readiness for hospitals, health systems, compounding pharmacies, home infusion centers, oncology clinics, and specialty pharmacies.

### Key Benefits

**Comprehensive Compliance:** Ensures adherence to USP Chapters 797 (sterile compounding), 795 (non-sterile compounding), and 800 (hazardous drugs) through automated task management and real-time tracking.

**Audit Readiness:** Provides audit-ready documentation and reporting, including real-time dashboards and detailed reports to simplify inspections by agencies like The Joint Commission, CMS, FDA, and State Boards of Pharmacy.

**Staff Competency:** Includes integrated staff training, competency management tools, and continuing education (CE) modules through the SoleSource Academy to standardize practices and ensure staff are up-to-date with the latest USP requirements.

**Operational Efficiency:** Automates daily, weekly, and monthly compliance tasks and integrates with environmental monitoring systems (e.g., Sonicu) to capture data automatically, reducing manual documentation errors and saving staff time.

### Target Users and Use Cases

The software is highly scalable and is primarily used by medium to large enterprise healthcare organizations, including:

Hospital and Health System Pharmacies

Compounding Pharmacies  
Home Infusion Centers  
Oncology Clinics  
Specialty Pharmacies

## Key Features

---

- Automated USP 797/795/800 Task Management
- Real-time Compliance Tracking and Notifications
- Audit-Ready Documentation and Reporting
- Staff Training and Competency Management (CE/LMS)
- Environmental Monitoring Integration (e.g., Sonicu)
- Customizable Analytics and Quality Scorecards
- System-wide Standardization Tools
- Single Sign-On (SSO) Support

## Pricing

---

**Model:** enterprise

Subscription-based pricing with an implementation fee, typically tiered based on the size of the health system or number of facilities. Pricing is not publicly disclosed and requires a demo request.

**Target Company Size:** medium, enterprise

## Integrations

---

Sonicu, EHR systems, Ping Identity (SSO)

## Compliance & Certifications

---

USP 797, USP 795, USP 800, SOC2
