Simplifi+ IV Workflow

Guided IV compounding workflow management system for patient safety, error reduction, and USP compliance.

https://www.wolterskluwer.com/en/solutions/simplifi-plus-pharmacy-compliance/iv-compounding-workflow

Overview

Simplifi+ IV Workflow Management, which integrates the Assure-Trak® IV Workflow Management solution, is a purpose-built, cloud-based system designed to improve patient safety and ensure regulatory compliance in pharmacy compounding. It is a core component of the Simplifi+ Pharmacy Compliance Suite from Wolters Kluwer.

Key Benefits & Capabilities:

Guided Workflows: Provides intuitive, step-by-step guidance for both pharmacists and technicians for patient-specific and anticipatory batch compounding.
Error Reduction: Configurable safety checks, smart ingredient verification using linear barcode scanning, and gravimetrics (implied by industry standard) help detect up to 14 times more errors than manual processes.
Compliance: Supports end-to-end compliance with USP Chapter 795, 797, and 800 requirements, as well as ISMP safety recommendations and DQSA compliance.
Remote Verification: Allows pharmacists to perform in-process, real-time, and remote compounding verification using photos or live video captured on commercial mobile devices, reducing interruptions in the cleanroom.
Documentation & Reporting: Automatically generates an Electronic Compounding Record for 100% of doses and provides inspection-ready reports and digital audit trails for simplified compliance management and audit readiness.
Scalability: The cloud-hosted platform (SoleSource®) offers turnkey configuration, standardization, and scalability across a single facility or multi-hospital health system with minimal IT dependency.
Target Users: Pharmacy leaders, pharmacists, and compounding technicians in hospitals, outpatient infusion centers, and health system central-fill facilities.

Key Features

- Guided Patient-Specific Compounding
- Anticipatory Batch Compounding
- Remote Pharmacist Verification (Photo/Video)
- Barcode Scanning for Ingredient Verification
- USP 797/800 Compliance Support
- Electronic Compounding Record (ECR)
- Single Sign-On (SSO)
- Inspection-Ready Reporting and Analytics

Pricing

Model: enterprise

Pricing is not publicly disclosed and requires a direct request for a demo and price quote. It is an enterprise-level subscription model for health systems and hospitals.

Target Company Size: medium, enterprise

Integrations

EHRs (HL7/FHIR Protocol), Simplifi 797 (Compliance QMS), Assure-Trak (Integrated IV Workflow)

Compliance & Certifications

USP 795, USP 797, USP 800, DQSA Compliance, ISMP Safety Recommendations, The Joint Commission (TJC) Medication Management
