SpryPT SLP

AI-powered, all-in-one practice management and EMR software designed specifically for Speech-Language Pathologists (SLP) and other rehab therapy clinics.

https://www.sprypt.com

Overview

SpryPT SLP is the specialized workflow within the comprehensive SpryPT EMR and Revenue Cycle Management (RCM) platform, purpose-built for Speech-Language Pathologists (SLPs) and other rehabilitation professionals (PT, OT). The platform is an all-in-one solution that automates every step from patient intake to final payment, aiming to reduce administrative burden and maximize reimbursements.

Key Features and Capabilities

AI-Powered Documentation:

AI Scribe: Uses artificial intelligence to convert dictation or text into structured SOAP notes in minutes, reducing note-taking time by up to 40%.

SLP-Specific Templates: Includes pre-built documentation and treatment plan templates for common speech disorders like articulation, language, and fluency delays, ensuring ASHA-compliant documentation.

SOAP Note Automation: Automates the creation of SOAP notes with clinical decision support and goal tracking with visual progress indicators.

Revenue Cycle Management (RCM) & Billing:

Real-Time Eligibility Verification: AI-powered, instant insurance eligibility verification with high accuracy (95%+), reducing claim denials.

Automated Claim Scrubbing: Built-in pre-checks flag issues before submission to minimize errors and accelerate reimbursement rates.

Automated Patient Invoicing: Integrates payment gateways (Square, Stripe, Clover, FORTIS) and allows for automated patient billing and payment collection via email and SMS.

Practice Management & Patient Engagement:

Integrated Telehealth: HIPAA-compliant platform for remote therapy sessions.

Patient Portal & Kiosk: Digital intake forms, online scheduling, and on-site Kiosk check-in for a seamless patient experience.

Home Exercise Program (HEP): Integrated HEP tool with a library of over 5,000 exercises, assignable directly from the patient note.

Business Intelligence: Real-time analytics dashboard for monitoring revenue, performance, and operational KPIs.

Target Users and Use Cases

The software is designed for Speech-Language Pathologists (SLPs), Physical Therapists (PTs), and Occupational Therapists (OTs). It serves a wide range of practice sizes, from solo practitioners to multi-location enterprises. Primary use cases include comprehensive SLP practice management, optimizing revenue cycle management, reducing documentation time, and ensuring regulatory compliance.

Key Features

- AI-Powered Clinical Documentation (AI Scribe)

- SLP-Specific Templates and Workflows

- Automated Revenue Cycle Management (RCM)

- Real-Time Insurance Eligibility Verification

- Integrated Telehealth Platform

- Patient Portal and Digital Intake Forms

- Home Exercise Program (HEP) Integration

- Business Intelligence and Analytics Dashboard
