

Streamline Healthcare MAT

An enterprise-grade, web-based Electronic Health Record (EHR) module for comprehensive Medication-Assisted Treatment (MAT) and Substance Use Disorder (SUD) care.

<https://streamlinehealthcare.com>

Overview

Streamline Healthcare MAT is a specialized module within the SmartCare™ EHR platform, designed specifically for behavioral health and human services organizations to manage Substance Use Disorder (SUD) and Medication-Assisted Treatment (MAT) programs. The platform is a true enterprise, cloud-based, single-platform solution hosted on the secure Microsoft Azure cloud, eliminating the need for disparate systems.

Key Features and Capabilities

The MAT functionality, delivered via the SmartCare Rx module, supports the safe and compliant prescribing of medications like methadone, naloxone, and naltrexone. The broader SmartCare platform provides a comprehensive suite of tools for clinical, administrative, and financial management, including:

Clinical Documentation: Intuitive workflows for intake, screening, assessments (ASAM, CAGE, AUDIT, etc.), and progress notes.

Medication Management: MAT functionality, integrated ePrescribing (SmartCare Rx) through the Surescripts network, and medication order tracking.

Revenue Cycle Management (RCM): Complete medical electronic billing, claims processing, and compliance reporting (DSM IV, V, CPT coding).

Mobile Access: SmartCare™ Anywhere mobile solution for online/offline access and field-based care delivery on smartphones and tablets.

Business Intelligence: Robust native reporting, analytics, and integration with leading BI programs for data-driven decision-making.

Patient Engagement: Integrated Patient Portal and Telehealth Module for virtual care and enhanced client communication.

Target Users and Use Cases

SmartCare is built for practices of any size, from small clinics to large, multi-faceted organizations, including Federally Qualified Health Centers (FQHCs) and Managed Care Organizations (MCOs). Its primary use cases center on treating the 'whole person' by seamlessly integrating behavioral health, substance use disorder treatment, and primary care on a single platform.

Key Features

- Medication-Assisted Treatment (MAT) Functionality
- SmartCare Rx ePrescribing (Surescripts)
- Revenue Cycle Management (RCM) & Billing
- Patient Portal & Telehealth
- Mobile EHR (SmartCare Anywhere) with Offline Access
- ASAM/SUD-Specific Screening & Assessment Tools
- Business Intelligence & Reporting
- Integrated Primary Care Functionality
