

Syntellis Axiom

Enterprise Performance Management (EPM) software for integrated financial planning, budgeting, forecasting, and decision support in healthcare and finance.

<https://www.syntellis.com/>

Overview

Syntellis Axiom is a robust Enterprise Performance Management (EPM) platform, primarily serving large healthcare organizations, financial institutions, and higher education institutions. The software unifies critical finance processes—including budgeting, long-range planning, forecasting, and reporting—onto a single, integrated, cloud-based platform.

Key Capabilities and Value Proposition:

Integrated Planning: Axiom supports driver-based budgeting, which links financial results to operational metrics like patient volumes and staffing levels, creating a transparent and dynamic planning process.

Advanced Analytics: It offers sophisticated scenario modeling tools, allowing users to test multiple financial outcomes and mitigate risk, which is essential in unpredictable markets.

Data Consolidation: The platform excels at integrating disparate data from multiple sources, including ERP systems and Electronic Health Records (EHRs), to provide a single source of truth for comprehensive financial, operational, and clinical analysis.

Decision Support: Modules like Axiom Enterprise Decision Support (EDS) and Axiom Intelligence provide cost accounting, profitability analysis, and customizable, real-time dashboards for data-driven decision-making.

While the software is highly customizable and powerful, it is typically implemented by medium to large enterprises due to its complexity and comprehensive feature set.

Key Features

- Driver-Based Budgeting & Forecasting

- Scenario Modeling & Long-Range Planning
- Cost Accounting & Enterprise Decision Support (EDS)
- Financial & Clinical Analytics (Axiom Intelligence)
- Automated Data Integration (ERP/EHR)
- Customizable Dashboards & Reporting
- Funds Transfer Pricing (FTP) & Profitability
