

Tenovi Home Health RPM

A Healthcare IoT platform providing cellular-connected Remote Patient Monitoring (RPM) and Remote Therapeutic Monitoring (RTM) devices and data aggregation for healthcare organizations.

<https://www.tenovi.com>

Overview

Tenovi Home Health RPM is a comprehensive Healthcare IoT platform and ecosystem designed to simplify and scale remote patient monitoring (RPM) and remote therapeutic monitoring (RTM) programs for healthcare organizations and RPM service providers. The core of the solution is the **Tenovi Cellular Gateway** (Health Hub), a plug-and-play device that automatically collects data from various Bluetooth-enabled, FDA-cleared medical devices (such as blood pressure monitors, scales, pulse oximeters, blood glucose meters, and smart pillboxes) and transmits it securely to the Tenovi Cloud via a multi-carrier cellular network. This design eliminates the need for patients to use a smartphone app, Wi-Fi, or complex syncing, significantly improving patient adherence and ease of use.

Key capabilities include **data aggregation and automation**, providing clinicians with a HIPAA-compliant dashboard (Analytics Portal) for real-time patient vital sign monitoring, health metric tracking, and alert management. The platform is designed for seamless integration with existing Electronic Health Records (EHR) and other software platforms through a robust **API**, enabling partners to efficiently scale their programs. The solution supports over 50 cellular-connected devices and is used by over 100 RPM companies to manage chronic conditions like hypertension, diabetes, congestive heart failure, and for postoperative care. Tenovi is a HIPAA-compliant Business Associate and has achieved SOC 2 compliance, ensuring high standards for data security and reliability.

Key Features

- Cellular Gateway (Plug-and-Play)
- 50+ FDA-cleared Device Integrations

- Data Aggregation & Automation
- Clinician Analytics Dashboard
- Patient Portal (Web App)
- API for EHR/Platform Integration
- Multi-Carrier Cellular Connectivity
- Visual Reminder System

Pricing

Model: enterprise

Subscription-based model for healthcare organizations and RPM companies. Pricing is not publicly disclosed and is handled through direct consultation. No free tier available.

Target Company Size: small, medium, enterprise

Integrations

A&D Medical, OMRON, Trividia Health, PatchRx, Halie® Inhaler Sensor, Welch Allyn, Nonin, Xandar Kardian, Rimidi

Compliance & Certifications

HIPAA, SOC2, FDA-cleared devices
