---

## Overview

---

TheraPlatform is a comprehensive, cloud-based, all-in-one practice management, EHR, and teletherapy solution built specifically for mental health practitioners, as well as speech, occupational, and physical therapists. The software is designed to streamline clinical operations and reduce administrative burden.

### Core Capabilities:

**Telehealth:** Offers a secure, HIPAA-compliant video conferencing platform with features like two-way screen sharing, a built-in interactive whiteboard, resource sharing, and in-session video play. The Pro Plus plan includes a library of interactive therapy apps and games, making it highly engaging, especially for pediatric clients.

**Practice Management & EHR:** Includes a robust calendar for scheduling, automated appointment reminders (email/text), a client portal for paperless intake and communication, and a full billing suite.

**Documentation:** Provides flexible, customizable note templates (including progress notes and treatment plans) and a form builder to create custom documents from scratch. The platform supports electronic signatures and features like AI-assisted note generation.

**Relapse Prevention Context:** The 'Relapse Prevention' aspect is supported by the platform's extensive library of customizable treatment plan templates and documentation tools, allowing therapists to easily create and manage relapse prevention plans for clients dealing with substance abuse or other maladaptive behaviors.

### Key Benefits:

All-inclusive system eliminates the need for multiple separate tools (e.g., separate billing, scheduling, and video conferencing).

Strong focus on engaging teletherapy with interactive tools.

Scalable for solo practitioners up to large group practices.  
High security and HIPAA compliance with bank-level encryption.
