---

## Overview

---

TherigySTM is a comprehensive, clinical software platform designed to help specialty pharmacies, PBMs, infusion centers, oncology clinics, and hospital systems manage the complexities of specialty care. Built by pharmacists, for pharmacists, the platform provides a single system to onboard, engage, and manage specialty patient populations, meet accreditation standards, and prove outcomes.

### Key Capabilities & Benefits:

**Standardized Care Plans:** Offers standardized care plans, activities, and protocols across 40+ therapeutic categories and 1,000+ medications, ensuring consistent, evidence-based interventions.

**Patient Engagement & Adherence:** Features a mobile-enabled patient messaging system for sending HIPAA-compliant assessments and reminders directly to patients' devices, which can result in up to 20% fewer call attempts.

**Interoperability:** Seamlessly integrates with Electronic Health Records (EHRs) and dispensing systems to automate patient onboarding and data flow, reducing manual data entry and improving communication.

**Accreditation & Compliance:** Supports pharmacies in achieving and maintaining accreditations, including URAC and ACHC, with 90% of customers attaining credentials through its built-in compliance features. The platform is also HITRUST CSF Certified.

**Referral & Financial Management:** Provides tools to manage specialty referrals, including benefits investigations, prior authorizations, appeals, re-authorizations, and securing financial assistance for patients.

**Reporting & Analytics:** Offers robust reporting and analytics tools, including the companion platform TherigyVista, to monitor key metrics, analyze trends in patient care, and provide financial insights.

TherigySTM is used by over 170 customers nationwide and manages care for more than 1.6 million patients.
