

Unlimited Financials

A robust, web-based Revenue Cycle Management (RCM) platform designed to streamline medical billing and maximize reimbursement for specialty healthcare practices.

<https://example.com/1762583716458>

Overview

Unlimited Financials is a full-featured, user-friendly Revenue Cycle Management (RCM) platform developed by Unlimited Systems, focusing specifically on the complex financial needs of specialty healthcare providers, including oncology, dermatology, and multi-specialty clinics. The software is engineered to drive 'Peak Financial Performance' by eliminating complex manual workflows, accelerating complete reimbursement, and supporting an exceptional patient experience.

Key Features & Capabilities

The platform provides comprehensive front- and back-office workflow features to streamline the entire billing process. Core modules include Patient Intake, Scheduling, Eligibility & Authorization, Charge Review & Claim Filing, Payment Posting & Denial Management, AR Management, and Analytics. It facilitates fast and accurate financial record-keeping, enabling practices to gain immediate insight into payments and accounts. The system supports various payment models, including Fee for Service, Capitation, Episodic Payments, Global & Case Rate Reimbursement, and Value-Based Contracts. Automated features include charge entry, credit card processing, electronic claim submission, and patient statement generation with online payment options.

Target Market & Technology

Unlimited Financials is utilized by RCM Services Providers, Independent Practices, Health Systems, and Enterprise Networks. Its focus on specialties like Cancer Care, Gastroenterology, Infusion Services, and Urology allows for deep integration into unique clinical and financial workflows. The software is deployed in the cloud (SaaS) and utilizes Microsoft Azure for security and data recovery. Interoperability is a key focus, with the 'Unlimited API' providing multiple endpoints for seamless data exchange with other technology systems, such as EHRs.

Key Features

- Revenue Cycle Management (RCM)

- Medical Billing & Claims Submission
- Patient Intake & Scheduling
- Eligibility & Authorization
- Accounts Receivable (AR) Management
- Payment Posting & Denial Management
- Detailed Financial Analytics
