

# Valant Scheduling

Integrated scheduling and practice management for behavioral health, featuring patient self-scheduling, automated reminders, and telehealth integration.

<https://www.valant.io>

---

## Overview

---

Valant Scheduling is a core, fully integrated feature within the **Valant Behavioral Health EHR (Electronic Health Record) and Practice Management suite**, designed specifically for psychiatrists, psychologists, therapists, and counselors in solo and group practices. It is not a standalone product but a command center for managing the entire practice workflow.

### Key Features and Capabilities

#### Scheduling & Practice Management:

**Integrated Scheduling:** Seamlessly manage multiple provider calendars, search availability, and tailor appointment categories (individual, group, IOP/PHP) within the EHR.

**Patient Self-Scheduling:** Patients can view available slots and request appointments via the secure MYIO Patient Portal, which the practice can then approve.

**Automated Reminders:** Reduces no-shows by automating reminders via the patient's preferred modality (text, email, robocall), in compliance with HIPAA and TCPA regulations.

**Group Scheduling:** Efficient tools for setting up one-off or recurring group appointments, including in-person or group telehealth, with built-in attendance tracking and documentation/billing workflows.

**External Calendar Sync:** Allows providers to sync their Valant calendar with external personal or work calendars for a comprehensive view.

**Prospective Patient Management (PPM):** Customizable inquiry forms for prescreening, collecting demographics, and matching prospects to the optimal provider, with data automatically populating patient charts upon conversion.

#### Clinical & Billing Integration:

**Telehealth Integration:** Fully integrated telehealth capabilities, including virtual consultations and secure links, directly from the scheduler.

**Integrated Payments:** Accepts credit card payments online and integrates payment processing with scheduling.

**Clinical Documentation:** Over 100 configurable note templates (e.g., SOAP, CBT, DBT, MFT) with narrative generation features to reduce documentation stress.

**e-Prescribing:** Integrated e-prescribing (eRx) with drug interaction checks and medication history access.

**Revenue Cycle Management (RCM):** Comprehensive billing, claims submission (including claims scrubbing), and reporting features for financial and operational insights.

**MYIO Patient Portal:** A secure, app-enabled portal for patients to manage appointments, complete forms, view and pay bills, and access documents.

## Key Features

---

- Integrated Appointment Management
- Patient Self-Scheduling via Portal
- Automated Appointment Reminders (Text/Email/Robocall)
- Group Scheduling (IOP/PHP Support)
- Integrated Telehealth
- Online Payment Processing
- E-Prescribing (eRx)
- Clinical Documentation & Note Templates
- Revenue Cycle Management (RCM) & Billing

## Pricing

---

**Model:** subscription

Customizable, subscription-based pricing that varies by practice size and needs (therapy, psychiatry, or billing agency). Official pricing requires a quote/demo. One source suggests a starting price of \$135 per month. No implementation fees are charged.

**Starting at:** USD \$135

**Target Company Size:** small, medium, enterprise

## Integrations

---

Office Ally (Service Center), DrFirst (iPrescribe), NexHealth

## Compliance & Certifications

---

HIPAA, TCPA
