

Veoci

A no-code, cloud-based platform for emergency management, business continuity, and daily operations, designed to enhance communication, collaboration, and response times.

<https://veoci.com>

Overview

Veoci is a comprehensive, no-code, cloud-based platform for Crisis, Incident, and Emergency Management, Business Continuity and Resilience, Continuity of Operations Planning, Team Collaboration, and Daily Operations. It is utilized by a wide range of organizations, including governments, aviation authorities, private companies, and healthcare institutions like hospitals and large healthcare systems. The platform's core value lies in its flexibility, allowing users to digitize plans, set up customized workflows, and automate alerts without coding. It provides real-time situational awareness, often through GIS mapping, and a suite of tools for streamlined communication.

Key features include Incident Management, Crisis Communication, Emergency Notifications, Risk Assessment, Business Impact Analysis, Plan Development/Activation, Resource Management, Compliance Tracking, Mobile Access, and Customizable Dashboards. For the healthcare sector, Veoci offers the specialized **Veoci Vitals EM** solution, which is built to handle incidents, Hazard Vulnerability Analyses (HVAs), After Action Reviews (AARs), accreditation, and governance, risk, and compliance challenges. The platform is noted for its user-friendly interface, making it accessible for both technical and non-technical teams, and its commitment to customer support and continuous development.
