

Vizzia

Real-Time Location Systems (RTLS) software and managed services for healthcare asset management, staff, and patient workflow optimization.

<https://vizziatech.com/>

Overview

Vizzia is a leading provider of Real-Time Location Systems (RTLS) software and managed services, primarily serving large healthcare organizations and hospital systems. The core product, **Vizzia InVIEWSM**, is a powerful, cloud-based software platform that provides real-time data analytics and process visibility to drive operational efficiency, reduce costs, and improve patient care. The platform is built on over 15 years of in-field experience and is hardware-agnostic, allowing it to integrate with various RTLS technologies (RFID, Wi-Fi, Bluetooth, Infrared, etc.).

Key Benefits:

Cost Reduction: Dramatically decreases equipment rental costs and eliminates lost/stolen assets by providing 24/7 visibility.

Improved Patient Care: Optimizes patient throughput in high-volume areas (E.D., O.R.) and reduces the risk of healthcare-acquired infections through automated hand hygiene monitoring.

Staff Efficiency: Eliminates wasted time searching for critical equipment, allowing clinicians to focus on patient care.

Main Features and Capabilities:

Asset Management: Tracks thousands of moveable medical equipment (MME) in real-time with interactive maps and customizable alerts.

Patient Workflow: Eliminates bottlenecks and automates communications in the Emergency Department and Operating Room.

Hand Hygiene Compliance: Automated monitoring and proactive alerts to reduce healthcare-associated infections.

Environmental Monitoring: 24/7 monitoring of temperature, pressure, and humidity for sensitive assets (e.g., vaccines, lab samples) with real-time alerts.

Staff Duress: Provides accurate location data for staff safety and duress alerts.

Hospital Wayfinding: Mobile app and web-based solutions for turn-by-turn indoor routing for patients and visitors.

Reports & Analytics: Robust, customizable, cloud-based dashboards (Operational, Historical, Productivity) for executive and operational teams.

Key Features

- Real-Time Asset Tracking (RTLS)
- Patient Workflow Optimization
- Hand Hygiene Compliance Monitoring
- Environmental Monitoring
- Staff Duress and Safety Alerts
- Customizable Analytics Dashboards
- Hospital Wayfinding (Mobile/Web)
- Hardware-Agnostic RTLS Integration

Pricing

Model: enterprise

Pricing is based on a custom, enterprise-level contract and managed service agreement for large hospital systems. No public pricing tiers are disclosed.

Target Company Size: enterprise

Integrations

Epic EHR, Microsoft Entra ID (SSO), NuvoLO CMMS, Get Well 360, Lynx Systems

Compliance & Certifications

HIPAA, HITRUST, SOC2 Type II
