---

## Overview

---

WebPT Sports Medicine is a specialized module and solution set within the comprehensive WebPT Practice Experience Management (PXM) platform, designed specifically for sports medicine practices and rehab therapists. The platform unifies electronic medical records (EMR), practice management, billing, and patient engagement tools into a single, cloud-based system.

### Key Benefits and Features:

**Sports-Specific Documentation:** Offers customized workflows and EMR content tailored to the unique needs of athletes, including objective tests like speed and agility assessments and running analysis.

**Integrated Practice Management:** Streamlines front office operations with features such as integrated scheduling, digital patient intake, and automated appointment reminders (which can reduce no-shows).

**Revenue Cycle Management (RCM):** Provides integrated billing solutions (like Therabill) to simplify claims submission, reduce denials, and maximize reimbursements. It includes built-in compliance checks for Medicare's 8-minute rule and NCCI edits.

**Compliance and Security:** The platform is HIPAA-compliant and adheres to SOC 2 and HITRUST CSF standards, featuring advanced security measures like Single Sign-On (SSO) and Multi-Factor Authentication (MFA).

**Patient Engagement & Outcomes:** Includes an interactive Home Exercise Program (HEP) with a patient-facing mobile app, as well as tools for outcomes tracking, benchmarking, and automated patient marketing to improve retention and attract new athletes. The platform also supports secure telehealth/virtual care appointments.

WebPT is built by therapists for therapists, focusing on ease of use, which allows practitioners to document efficiently and spend more time on patient care. It is a highly scalable solution, serving practices from start-up to enterprise size.

## Key Features

---

- Sports-Specific EMR Documentation
- Speed and Agility Assessments
- Integrated Billing & RCM (Therabill)
- AI-Powered Compliance Checks & Coding
- Digital Patient Intake & Scheduling
- Interactive Home Exercise Program (HEP)
- Outcomes Tracking and Benchmarking
- Automated Patient Marketing & Engagement
- Telehealth/Virtual Care

## Pricing

---

**Model:** subscription

Subscription-based, per-provider pricing starting at \$99 per user, per month for the EMR. Additional modules (like RCM services) and enterprise plans are custom-quoted. An additional setup fee is required.

**Starting at:** USD \$99

**Target Company Size:** startup, small, medium, enterprise

## Integrations

---

Therabill (WebPT Billing), Medsender, OpenPM, Keragon, Comprehend PT (AI Scribing)

## Compliance & Certifications

---

HIPAA, SOC2, HITRUST CSF
