---

## Overview

---

WellSky Hospice is a comprehensive and integrated electronic health record (EHR) and management solution designed specifically for hospice and palliative care providers. The platform combines intuitive point-of-care tools for clinicians with sophisticated back-office capabilities for financial and operational management.

### Key Benefits & Capabilities:

**Advanced Predictive Insights:** Utilizes tools like CareInsights and Value-Based Insights to provide real-time predictive analytics, including seven-day mortality and live discharge risk predictions, helping clinicians with proactive care planning and resource allocation.

**Regulatory Compliance:** It is a 2015 Certified EHR Technology (CEHRT) and is specifically updated to ensure compliance with major regulatory changes like the Hospice Outcomes and Patient Evaluation (HOPE) assessment, offering streamlined, AI-powered documentation to meet requirements.

**Operational Efficiency:** Features like care-centric scheduling, resource management, and efficient documentation streamline workflows, reduce manual processes, and support agency growth.

**Integrated Management:** The solution integrates clinical, operational, and financial tools, including Claims Management, Quality Assurance, Bereavement Management, and Volunteer Management.

**Interoperability:** Supports secure patient information exchange via a FHIR R4 compliant API and CCD documents, facilitating seamless collaboration with other healthcare providers.

WellSky Hospice is targeted at small, medium, and large hospice agencies looking to improve patient outcomes, enhance operational efficiency, and maintain strict regulatory compliance in the value-based care environment.
