

# WRS Health

Cloud-based, specialty-specific EHR and Practice Management software with integrated RCM and AI-powered workflow solutions for medical practices.

<https://example.com/1762583716455>

---

## Overview

---

WRS Health is an all-in-one, cloud-based platform that provides a fully integrated solution for Electronic Health Records (EHR), Practice Management (PM), Revenue Cycle Management (RCM), and a patient portal. Designed by practicing physicians, the software features specialty-specific templates for over 35 medical fields, ensuring a customized workflow right out of the box, which is a key differentiator from generic EMR systems.

The system incorporates "All In Intelligence" AI agents to automate and streamline core administrative and clinical tasks, including E/M coding suggestions, charting, scheduling, and billing, which is intended to reduce administrative burden and enhance documentation accuracy. WRS Health is suitable for medical practices of all sizes, from private practices to ambulatory services.

Key capabilities include e-prescribing (Surescripts certified), comprehensive patient health information management (ePHI storage), interoperability via FHIR-based API technology, and robust compliance tools, including MIPS reporting. The platform's strong focus on RCM and billing integration helps practices optimize revenue and ensure accurate claims processing.

## Key Features

---

- Electronic Health Records (EHR)
- Practice Management (PM)
- Revenue Cycle Management (RCM)
- Specialty-Specific Templates (35+)
- Integrated Patient Portal
- AI-Powered Coding and Charting
- e-Prescribing (Surescripts Certified)
- MIPS Dashboard & Reporting

## Pricing

---

**Model:** subscription

Customizable monthly subscription based on the number of users. Discounts available for multi-provider organizations and bundled services. A reported minimum of \$600 per month for 10+ users has been noted.

**Starting at:** USD \$600

**Target Company Size:** small, medium, enterprise

## Integrations

---

Health Information Exchange (HIE), Labs and Diagnostic Equipment, Surescripts (e-Prescribing), FHIR-based API apps, Billing Software

## Compliance & Certifications

---

HIPAA, ONC-ATCB, CCHIT, 2015 Edition Certified
