Yardi Senior Living Suite

Integrated cloud-hosted software suite for senior living management, unifying resident care, finance, sales, and operations on a single platform.

https://www.yardi.com

Overview

The Yardi Senior Living Suite is a comprehensive, cloud-hosted software solution designed specifically for senior living communities, including independent living, assisted living, memory care, skilled nursing, and long-term care. It functions as a single, integrated platform that replaces disparate systems to unify all aspects of senior living management: resident care, finance, sales, marketing, and operations.

The core of the suite is **Yardi Voyager Senior Housing**, the community management and financial accounting platform, which provides a full general ledger, accounts payable/receivable (AR/AP), and budget management. This is seamlessly integrated with the clinical and resident-facing modules.

Key Features and Capabilities:

Clinical Services: Includes **Yardi EHR** (Electronic Health Record) for full-service clinical documentation, assessments, and point-of-care charting (available via mobile apps for iOS and Android). **Yardi eMAR** (Electronic Medication Administration Record) is integrated to ensure safe and effective medication administration, including pharmacy network integration.

Sales & Marketing: RentCafe Senior CRM is a mobile-friendly solution that manages the prospect-to-resident journey, automates sales workflows, and ensures real-time integration of care costs into move-in proposals.

Business Intelligence & Oversight: Yardi Senior IQ provides real-time analytics and pre-configured key performance indicators (KPIs) on financial, occupancy, and operational performance, giving executives end-to-end oversight.

Compliance & Claims: The suite includes **Yardi Claims Manager** for streamlining Medicaid claims submission and provides tools for managing compliance with regulations like MDS for skilled nursing.

Resident & Family Engagement: The **RentCafe Senior Living Portal** is a secure online portal and mobile app that allows residents and families to manage payments, review health information, sign up

for wellness activities, and communicate with care providers.

The platform is designed to improve care, enhance efficiency, mitigate risk, and maximize occupancy. It is scalable to accommodate communities of all sizes and offers comprehensive support and training.

Key Features

- Integrated Property/Community Management (Yardi Voyager)
- Electronic Health Record (Yardi EHR)
